

GIRSIG STUDY DAY 2009

DATE
CONFIRMED

A JOINT STUDY DAY OF THE COLLEGE OF RADIOGRAPHERS and THE GASTRO-INTESTINAL RADIOGRAPHERS SPECIAL INTEREST GROUP

24 October 2009

Edinburgh

The purpose of this study day is to introduce radiographers with an interest in GI radiology to the many and varied techniques, procedures and investigative pathways currently employed by different disciplines to demonstrate the assorted pathologies encountered in the GI tract.

The format of the day will be a lighthearted journey through the gut.

Talks will be interspersed with discussions regarding the impact of role development on patient care.

The outcomes of the day will include:

- A broad appreciation of current practice
- An understanding of the investigative input from other disciplines
- A refresher on the implications of GI pathologies
- An appreciation of the impact of role development
