

REDUCING THE RISKS AND IMPACT OF WORK-RELATED MUSCULOSKELETAL DISORDERS IN MAMMOGRAPHY

REPEATED
DUE TO
POPULAR
DEMAND

11 May 2010
Glasgow

This conference aims to raise awareness of the work-related injury that is affecting members of the radiographic workforce. Musculoskeletal disorders are a threat to the health of mammographers, a threat to their careers, and a threat to the services that they have worked so hard to establish. The causes, risks and control measures are complex and challenging.

PROVISIONAL PROGRAMME

- 9.30am Coffee and Registration
